AI-Powered Finance Transformation & CFO Services

Helping Australian businesses streamline finance operations, harness data, and drive strategic growth.

Transform your finance operations with AI-powered automation, predictive analytics, and seamless system integration.

Let's Chat!

🚀 AI-Driven Finance Automation for CFOs & Finance Leaders
💡 Eliminate manual finance processes, enhance forecasting accuracy, and gain real-time financial insights with AI-powered automation.
🔷 Tired of slow, manual financial processes?
🔷 Struggling with forecasting accuracy and real-time data?
🔷 Want to integrate AI into your finance systems seamlessly?

We hear you. Think Numbers transforms your finance function from the ground up – integrating modern financial systems, automation and AI, and strategic CFO expertise to solve these pain points. Our Sydney-based team of finance and technology experts works alongside you to eliminate inefficiencies and unlock real insights, so you can focus on growth and innovation.

- Cut manual work by 50%+: Automate repetitive accounting tasks and reduce human error, freeing your team for higher-value analysis.
- Faster reporting & close cycles: Go from days or weeks to hours – we streamline reporting and month-end close so you get timely, accurate data when you need it.
- Better forecasts & decisions: Improve forecast accuracy and gain real-time visibility into your numbers, empowering confident, data-driven decisions.

We are lucky to have a project manager who can build Anaplan models at the same time. It made the discussions with external contractors a lot easier. You have also inspired me to do the model building training. Thank you very much for everything!

Bernaley Olofernies (Head of Business Partnering)

Why CFOs & Finance Leaders Choose Think Numbers

We help CFOs and finance teams leverage AI-powered automation to eliminate inefficiencies, enhance forecasting accuracy, and unlock real-time financial insights.

We blend deep finance experience with cutting-edge tech savvy. Our consultants have sat in the shoes of CFOs and FP&A leads – we speak the language of business, not just IT. From implementing AI-driven tools to providing fractional CFO guidance, we deliver solutions that are practical, scalable, and tailored to your needs. We've helped ASX-listed companies and high-growth startups alike achieve measurable results, such as reducing manual effort by 40–60% and shaving several days off reporting timelines. Our mission is simple: make your finance function smarter, faster, and more strategic.

Who We Help

Finance AI & Automation Solutions

- **CFOs & Finance Executives:** Overwhelmed by legacy systems and mounting pressure to deliver insights? We modernize your finance systems and processes, giving you timely information and peace of mind to focus on strategy.
- **FP&A Leads & Heads of Operations:** Struggling with

scattered data and inconsistent reports? We integrate planning and analytics tools to create a single source of truth, so your team can produce reliable forecasts and actionable operational dashboards.

- **Startup Founders (FinTech/SaaS):** Lacking senior finance support or robust systems as you scale? Our fractional CFO services provide on-demand strategic finance leadership – from cash flow planning to investor reporting – without the full-time cost, setting you up for sustainable growth.
- **Consulting & Tech Partners:** Need a trusted finance transformation specialist to augment your projects? We partner with consulting firms and technology providers to deliver seamless, integrated solutions for mutual clients, marrying our finance expertise with your services to ensure successful outcomes.

At Think Numbers, every engagement is led with a personal, hands-on approach. We pride ourselves on being **professional yet approachable** – the kind of partner who'll roll up our sleeves to solve complex problems, but also speak plainly and honestly about what will drive results. Based in **Sydney, Australia,** we understand the local business landscape and regulations, while bringing global best practices in finance and automation.

Ready to transform your finance function? Let's talk about how we can reduce your workload, improve your financial insights, and help your business thrive. **Schedule a call** with our experts today and take the first step toward smarter finance. (Your success is our number one number.)
