

The Leading Dentistry Lab

Dental Sleep Lab. We are an Australian dental laboratory offering a complete range of advanced technologies—CAD (Computer-Aided Design), CAM (Computer-Aided Manufacturing), and 3D-printing—for the production of oral appliances. We specialize in creating high-quality, custom-fit solutions for snoring, sleep apnea, and bruxism, ensuring precision and improved patient care.

ABOUT US

Dental sleep lab is the first full service digital dental laboratory in Australia.

We provide the full range of quality, oral appliances for snoring, sleep apnea and bruxism to specialists and general dentists throughout Australia.

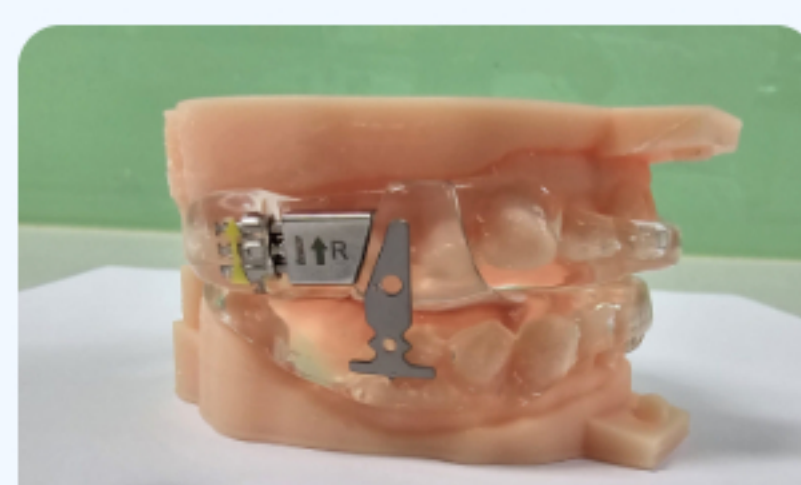

We are committed to delivering superior quality appliances, investing in, and providing:

- Quality milling techniques that deliver the exact trimming of all appliances
- CAD CAM technology allowing precision, fit, comfort and strength with minimal dimensions
- Innovative lab management software for reliable tracking and processing of cases
- Continuous research and development of mechanisms and materials.

FAQ

Frequently asked questions

What is the best appliance for Sleep Apnoea and Snoring?

There are a number of excellent appliances, each with independent published studies that can be successfully used. There is currently no one appliance that is regarded as superior to any other – despite the claims by manufacturers. Each of these appliances have their own individual pros and cons.

Dental Sleep Lab only uses these state of the art appliances and can help with selection

What is the best material for oral appliances?

How long do appliances last with daily use?
