

- Patient education materials, including demonstration appliances, posters, brochures and newsletters
- Screening and diagnosis of Sleep Apnoea for your patients

Our dentists can advise on appliance selection, design, materials and provide full clinical support.

## CAD CAM 3D Printing

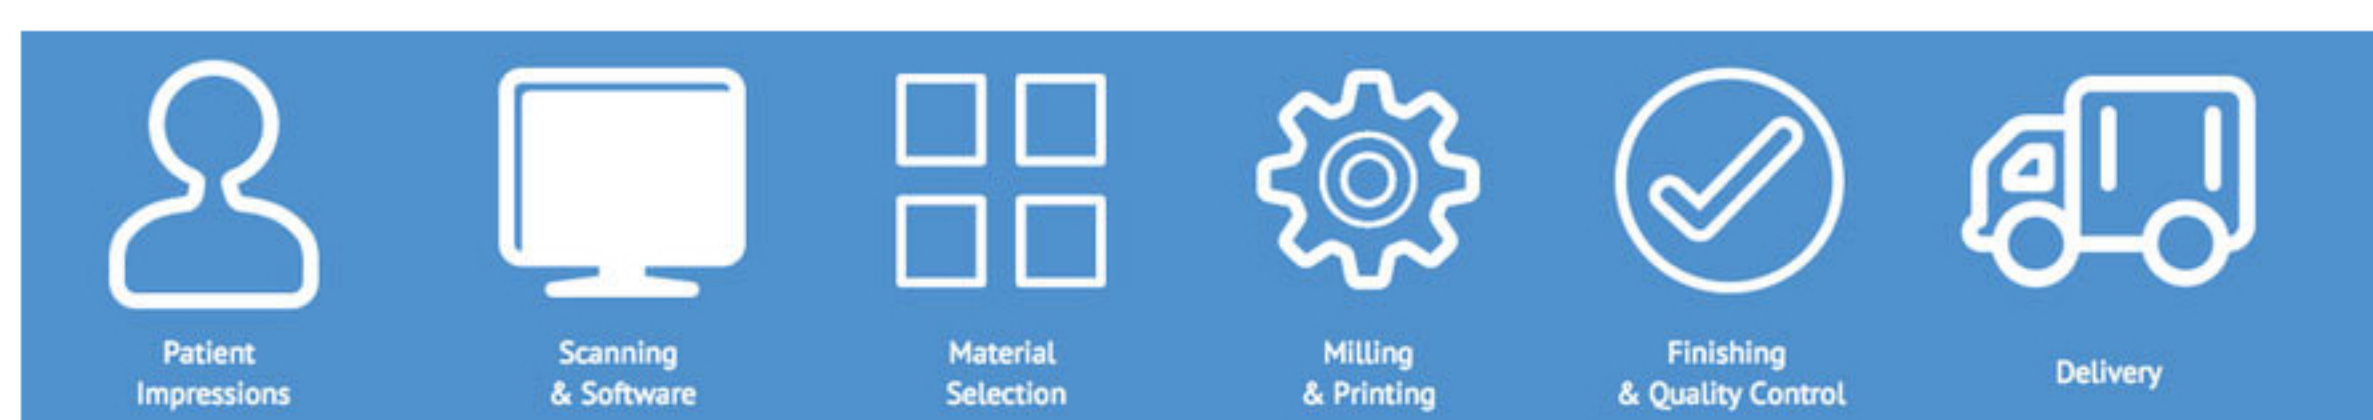

Dental Sleep Lab is the only Australia dental laboratory to offer CAD CAM 3D printing for all oral appliances for snoring, sleep apnoea and bruxism.

Our commitment to this exceptional technology is achieving outstanding results including:

- Enhanced fit
- Minimal thickness
- Uniform dimensions
- Increased strength
- Prompt turnaround times

Your specific design requirements can be locked into the system ensuring predictable appliances, requiring virtually no adjustments.

Dental Sleep Lab provides a fully integrated workflow for oral appliances using CAD CAM technology.

## Scanning Models

We will scan your impressions, or models with high accuracy using 3Shape scanners.

Our skilled dental technicians digitally design your models for the milling tools, systems and software programs to create your oral appliance.
