How We Handle Pain

At PainMed, our approach to pain management encompasses several key pain treatments in Sydney:

Specialist Pain Assessment

We offer comprehensive evaluation and precise diagnosis of sciatica and other nerve-related conditions.

Pain Medications

After a thorough assessment, our pain clinic in Sydney will develop a comprehensive medication management plan, helping you manage and alleviate your pain symptoms.

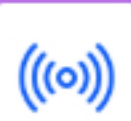

Interventional Procedures

We utilise advanced techniques like targeted nerve blocks and non-surgical back pain treatments to address specific pain sources for effective relief.

OUR NICHE

Comprehensive Pain Management for Various Conditions

Our pain clinic in Sydney offers a broad spectrum of treatments, each designed to address specific pain-related conditions:

Radio Frequency

Radiofrequency ablation (RFA) is an outpatient procedure used predominantly for treating spinal pain. It is also called spine facet joint denervation, neurotomy, or rhizotomy.

Neuromodulation

Involves electrical stimulation of nerves to alter pain signals before they reach the brain.

Diagnostic Injections

From lower back pain to nerve pain, we can help you identify the exact source of pain and inform you of targeted treatment strategies.

Pulsed Radio Frequency

A minimally invasive procedure by our pain clinic in Sydney that modifies nerve activity to provide long-term pain relief.

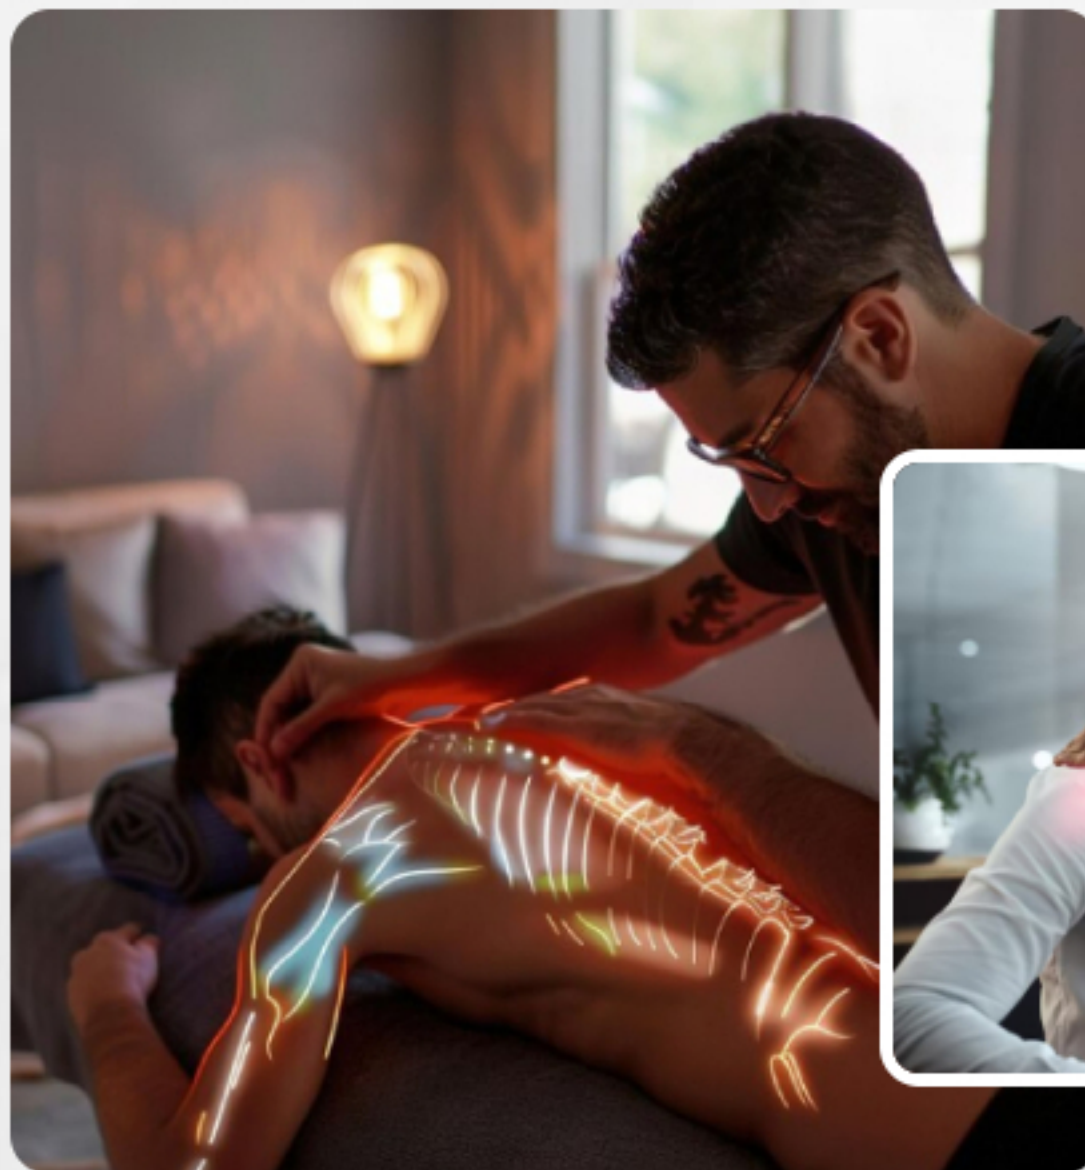

Regenerative Therapy

Utilising Platelet-Rich Plasma (PRP) and other advanced techniques, we stimulate tissue healing and provide lasting pain relief through targeted interventional procedures.

Cancer-Related Procedures

Specialised interventions by our interventional pain specialists to manage pain associated with cancer and its treatments.

Why Choose PainMed?

At PainMed, we pride ourselves on our unique approach to pain management. Our pain management programs in Sydney are designed to address not just the physical symptoms but also the psychological and social aspects of pain. This comprehensive approach is delivered through a team of experts, including physiotherapists, dieticians, and exercise physiologists.

We specialise in supporting patients recovering from work cover claims and road traffic accidents, offering tailored care to meet the specific needs and challenges of these individuals. Our team is experienced in navigating these complex cases, ensuring each patient receives the focused attention they deserve.

We believe in empowering our patients through education and active participation in their pain treatment plans. Our comprehensive pain management programs incorporate a variety of therapies, ensuring a holistic approach to your well-being.
