Solar Services

Commercial Solar

Commercial solar will not only cover daytime energy consumption but also export surplus electricity to grid that will give money back thus making it a rewarding investment.

READ MORE →

Battery Storage

battery storage offers a range of valuable options such as using own power at night, which is stored from solar during the day, and changing electric vehicles (EV) to reduce transportation costs to a great extent.

READ MORE →

Residential Solar

A residential solar system could be anywhere between 3kW and 20kW depending on your requirements, existing metering connection (1, 2 or 3 phase), solar approval (approval to connect solar) and roof space (including its orientation).
