Easy Maintenance & Cleaning
Urimat Australia Waterwise Technology's advanced technology and design offer easy cleaning and maintenance of its Waterless Urinals.

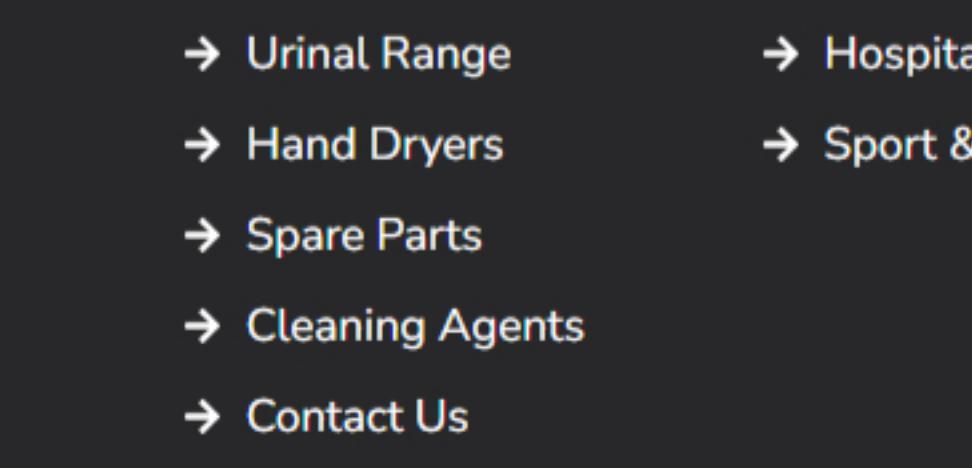

REVIEW

Testimonials

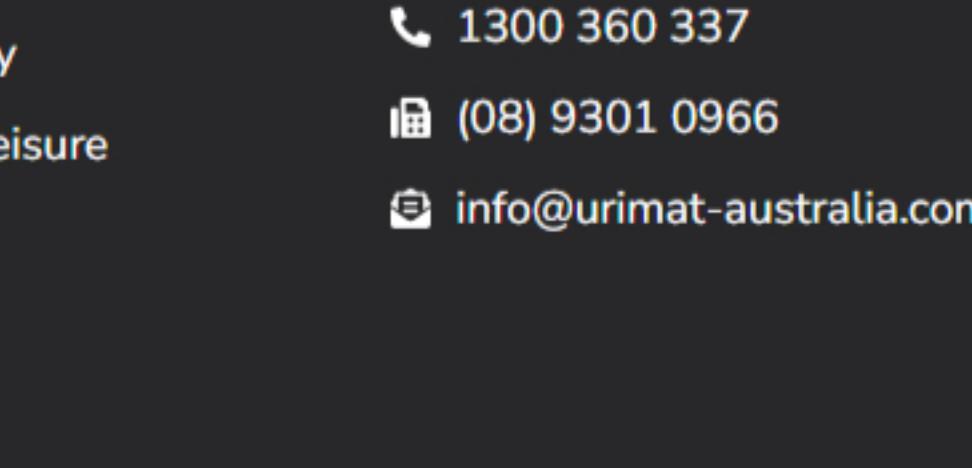

We've had 4 URIMAT waterless urinals for over 6 months. They've provided a cost-effective upgrade to our 17-year-old units, avoided a lengthy expensive renovation. No units leaking or clogging or odour issues. The units are highly recommend Urimat waterless urinals.

Jim Longbottom

Thank you for recommending Urimat products for our premises. Since their clean and odour-free. We would gladly welcome a quotation for future installations.

Adrian Gastevi

In 2005, we began shifting to water-saving urinals. After mixed results with the initial effective—no odours, less cleaning, minimal maintenance—units, we tried Urimat. Urimat provided maintenance. Our tenant, Novaboard Energy Ltd, was impressed. By November 2007, 91 urinals were installed. We fully recommend Urimat.
