About Us

Seamless Acoustic Solutions for Walls and Ceilings

VIP Designs specialises in seamless acoustic plaster ceilings and walls that transform how spaces look and sound. We provide custom-designed, sound-absorbing finishes for commercial and residential spaces across Australia. Our certified installation of BASWA Phon, a premium Swiss-made system, allows us to merge acoustic control with elegant, seamless surfaces.

We collaborate with architects, designers, and acoustic engineers to deliver high-performance acoustic solutions Australia wide that balance quiet comfort with refined visual design. Whether you're designing a gallery, office, or open-plan living area, we create spaces that feel calm, balanced, and quietly beautiful.

Experience Seamless Sound Control with our BASWA Acoustic Plaster Systems

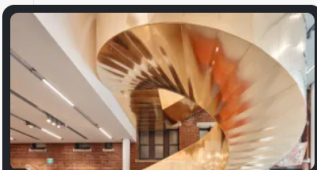

When silence matters just as much as style, BASWA is the name professionals trust. In addition to reducing echo, the BASWA Acoustic Plaster blends into any interior, almost invisible to the eye, yet powerful in performance.

The finely tuned microstructure of the BASWA system absorbs reverberation while maintaining a completely smooth, continuous finish. Manufactured in Switzerland and applied by our certified installers in Australia, it's a choice that combines performance, sustainability, and sophisticated minimalism.

MULTIPLEX

Our Featured BASWA Acoustic Plaster Solutions

The BASWA Phon system sets the standard in seamless acoustic systems. Ideal for museums, offices, galleries, and residences, it combines micro-porous mineral surfaces with natural aggregates to deliver high sound absorption and a flawless aesthetic.

Designed and installed by VIP Designs' certified team, each BASWA acoustic ceiling is smooth, durable, and environmentally responsible. The system is flexible enough for curved or complex surfaces while maintaining perfect continuity. With the introduction of BASWA installation, we've given Australian architects and designers access to world-class acoustic performance and aesthetic flexibility.

For flawless acoustic solutions in Australia, call **+61 406 011 642** and get in touch with our team today.

FAQs

What is acoustic plaster, and how does it work? ^

Acoustic plaster is a specialised surface coating that absorbs sound waves rather than reflecting them. It uses micro-porous materials that trap and diffuse sound energy, improving clarity and reducing echo.

What is the difference between acoustic plaster and traditional panels? v

Can acoustic plaster be applied to walls and ceilings? v

Which Australian regions do you service? v

How long does the acoustic ceiling installation process take? v

Do you offer acoustic ceiling installation across Australia? v

Australian Installation Partner

VIP Designs are the first Australian Certified Installers for the BASWA Phon range of seamless acoustic plaster solutions.
