10+

YEARS EXPERIENCE

ABOUT US

Wet and Dry Sliptesting to Australian Standards you can trust

Established in 2015 by our Technical Director, Gary Wiltshire, SlipTest Victoria was created in response to the growing demand for building compliance and slip resistance testing across Australia. Backed by extensive experience in property and facilities management, Gary built the company on a foundation of accuracy, reliability, and industry expertise.

Today, SlipTest Victoria is proudly NATA accredited to ISO/IEC 17025 standards (Accreditation No. 19858) and is trusted by many leading blue-chip property management companies throughout Victoria. In recognition of his industry expertise, Gary was also invited by National Association of Testing Authorities (NATA) to join its panel of technical assessors for ISO/IEC 17025 accreditation.
