Brisbane Home Designers Delivering Custom Homes, Renovations & Drafting Solutions

Creating a home that truly fits your lifestyle takes more than a good floor plan. It requires thoughtful design, practical solutions, and a team that understands how homes are actually built. Realex Design is a Brisbane-based residential design studio offering custom homes, renovations, building design, interior design, and drafting services under one roof.

With more than 20 years of experience working alongside Queensland builders, we understand the balance between creative design and real-world construction requirements. We utilise advanced LiDAR scanning technology for renovation projects, providing highly accurate site measurements that help reduce construction risks, unexpected variations, and costly surprises later in the process.

Whether you're planning a new family home or transforming an existing property, our Brisbane home designers focus on delivering designs that are functional, buildable, and tailored to your needs.

What We Do

Residential Building Design in Brisbane

01

Building Design Brisbane

Our building design services cover everything from initial concepts to detailed plans ready for approval and construction. We work closely with homeowners to create practical, attractive designs suited to modern living.

02

Custom Home Design

Every family lives differently. That's why our custom home design service focuses on creating homes that reflect your lifestyle, site conditions, and future plans rather than relying on standard templates.

[View More →](#)

03

Home Renovations & Extensions

Renovating can feel exciting and overwhelming at the same time. We help simplify the process with renovation and extension designs that improve functionality, maximise space, and enhance the property value.

04

Drafting Services

05

Construction Documentation

06

Interior Design Support

Our drafting team prepares accurate technical documentation to support residential projects of all sizes, ensuring builders and consultants have clear information throughout the process.

[View More →](#)

We provide detailed construction drawings designed to support approvals, builder pricing, and construction delivery with confidence.

[View More →](#)

Good design isn't only about walls and rooflines. Our interior design support helps homeowners create spaces that feel cohesive, practical, and comfortable to live in every day.

Why Choose Realex Design

One-Stop Residential Design Studio

As experienced home designers in Brisbane, we provide integrated building design, drafting, and interior design services to create a seamless experience from concept through to documentation.

20+ Years of Industry Experience

Our team has spent decades collaborating with leading Queensland builders, giving us valuable insight into construction requirements and industry expectations.

Advanced LiDAR Scanning Technology

Accurate renovation measurements help minimise risk, reduce site uncertainties, and improve project efficiency.

Practical & Buildable Design Solutions

We believe great design should work in reality, not just on paper. Every layout is developed with construction practicality in mind.

Streamlined Pre-Construction Process

We assist with consultant coordination and approval requirements, helping projects move forward more efficiently.

Our Design Process

Contact Us Now →

Initial Consultation & Project Brief

We begin by understanding your goals, lifestyle requirements, budget, and site constraints.

Concept Design & Planning

Initial concepts and layouts are developed to establish the overall design direction.

Design Development & Documentation

Plans are refined, details are resolved, and project documentation is prepared.

Approval & Consultant Coordination

We coordinate consultants and support the approval process to help prepare your project for construction.

Brisbane Home Designs Tailored to Modern Living

At Realex Design, we combine experience, technology, and practical expertise to create homes that not only look great but work beautifully for everyday living.

Functional Family Layouts

Homes are designed around the way families actually live, gather, work, and relax.

Indoor-Outdoor Living Design

Brisbane's climate naturally encourages indoor-outdoor connections, and we design spaces that make the most of it.

Energy-Efficient Design Thinking

Thoughtful orientation, ventilation, and planning contribute to more comfortable and efficient homes.

Designs Suited to Brisbane Climate Conditions

As home designers Brisbane homeowners trust, we create designs that respond to local weather conditions and lifestyle expectations.
